

UNIVERSITY
OF
YAMANASHI

Atherosclerosis Forum

Special lectures

George Liu, Ph.D. Professor
Cardiovascular Research Center
Peking University, China

"Correction of seipin deficient lipodystrophy by adipose transplantation and adipose-specific seipin transgenic expression"

Xiang-an Li, Ph.D.
Associate Professor
Department of Pediatrics
Saha Cardiovascular Research Center
University of Kentucky College of Medicine, USA

"Roles of scavenger receptor-B1 and HDL in sepsis"

Other Presentations:

- 1. *Probucol stabilized the lesions of atherosclerosis of WHHL rabbits***
(Shen Li, Department of Molecular Pathology, University of Yamanashi)
- 2. *Comparative analyses of lipoprotein lipase, hepatic lipase and endothelial lipase and their binding properties with known inhibitors***
(Ziyun Wang, State Key Laboratory of Natural and Biomimetic Drugs, School of Pharmaceutical Sciences, Peking University)
- 3. *The guidelines for analysis of coronary atherosclerosis in rabbits***
(Ahmed Bilal Waqar, Department of Molecular Pathology, University of Yamanashi)
- 4. *Bisphenol A impairs insulin sensitivity, glucose metabolism and liver functions in WHHL rabbits*** (Chao Fang, Department of Molecular Pathology, University of Yamanashi)

◆ **Date: July 16th, 2013 14:00pm~**

◆ **Place: Discussion Room (Graduate School Building, 3F)**

Department of Molecular Pathology
